### Process of Curriculum Design

**Operational Definition**

The institution has clearly laid down policies, regulations and committees for implementation of the programme. There exists a written policy, which is evolved and owned by the staff, students and management. The Policy is realistic and reflects the local and school contexts. Regulations are clearly laid down, they are comprehensive, and the mechanism for their implementation is articulated. The mechanism includes those of constitution, empowerment and renewal of committees with clearly laid down terms and conditions.

**Importance of the Indicator**

A clear statement of Policies, Regulations, and Committees is essential for organizing the programme as envisioned in the curriculum. It also brings uniformity in implementation by more than one unit of the institution and ensures equivalence in successive implementation.

**Source of evidence**

The prospectus of the programme and policy document of the institution.
The institution has stipulated the entry requirements for the programme and they are appropriate and stated clearly.

Operational Definition

The entry requirements are well deliberated and are in tune with the existing context of school as well as higher education, which are the beneficiary and the feeder systems respectively. The entry requirements are so stated that there is hardly any scope for misinterpretation.

Importance of the indicator

Any teacher education programme should state the entry and terminal behaviour of those who undergo the curriculum. If aims and objectives of the curriculum specify the terminal behaviours, the entry requirements in terms of qualification, age, experience, etc. indicates the entry behaviours expected for the trainee to benefit from the programme.

Source of evidence

The prospectus of the programme.

Indicators

**INDICATOR 2**

Operational Definition

The institution has stipulated the entry requirements for the programme and they are appropriate and stated clearly.

Importance of the indicator

Any teacher education programme should state the entry and terminal behaviour of those who undergo the curriculum. If aims and objectives of the curriculum specify the terminal behaviours, the entry requirements in terms of qualification, age, experience, etc. indicates the entry behaviours expected for the trainee to benefit from the programme.

Source of evidence

The prospectus of the programme.

**INDICATOR 3**

Operational Definition

The objectives of the programme are laid down clearly by the institute.

Importance of the indicator

Objectives are statements that indicate how the vision is to be achieved. They are the basis upon which the curricular inputs are designed. Since they are measurable, the programme effectiveness can be evaluated against them. Hence they should be stated clearly for an institution to monitor its functional efficacy, and take corrective steps to improve the quality of the programme.

Source of evidence

The prospectus, management, staff and students.

**INDICATOR 4**

Operational Definition

The duration envisaged for the programme is appropriate for achieving the stated objectives.

Importance of the indicator

Appropriate inputs and experiences are necessary for achieving the stated objectives. Time provided for an input would reflect the importance attached to it. Since acquisition of competencies occurs at different paces for different learners, the time spent on specific components of the programme and in turn the total duration of the programme influences the quality of the programme.

Source of evidence

The prospectus and the staff.
QUALITY ASPECT: Curriculum Content

INDICATOR 5: The institution implements the programme with enough flexibility to incorporate emerging concerns and expectations from a teacher.

Operational Definition: The programme has a scope for inputs such as field visits, special lectures, seminars and symposium that are aimed at extending the scope of the curriculum to provide an exposure on emerging issues and concerns in school education and develop attitudes and skills to address those issues and concerns.

Importance of the Indicator: Despite frequent curriculum revision, there would always be a mismatch between the curriculum of teacher education and the school reality. A rigid curriculum would make this mismatch more pronounced. Hence, there is a need for a certain amount of flexibility in the curriculum to incorporate the emerging concerns. In other words, the teacher education curriculum should respond to both the current and the futuristic scenario of school education.

Source of evidence: The annual report of the institution, staff and students.

INDICATOR 6: The institution has a clear-cut allocation of time for theory and its allocation in the timetable is based on a process of deliberations.

Operational Definition: There exists a timetable for the theory, which is evolved in consultation with the staff before its implementation. It is made available to the staff as well as the students.

Importance of the Indicator: For a programme to be implemented by a team of faculty members, it is necessary that every one is aware of his/her roles and responsibilities and there is a clearly laid down schedule. A timetable is not merely an arrangement for work allocation. It needs to be worked out in consultation with the staff for accommodating their preferences. It should be ensured that the staff and students has it well in advance so as to plan and prepare properly. It should be available with the students to ensure that there is no loss of instructional time.

Source of evidence: The timetable and the staff profiles and deployment strategy.

INDICATOR 7: The institution has a clear-cut allocation of time for “institution level practices”, “school based practices” and “whole school practices” under the programme, and there are mechanisms to ensure adherence to it.

Operational Definition: The timetable shows clear demarcation of sessions for institution level, school based and whole school teaching practice and the staff associated with its organization. The annual calendar of the institution incorporates the period during the academic year when the students would be in school. The allocation should reflect an
understanding of the school context and is arrived at in consultation with the schools concerned.

Practice in teaching is a major component of teacher education programme and it has a certain weightage assigned in the curriculum.

Experiences and practice in teaching are provided at the institution level with peers as students and at the school level. The experiences at the school should include both teaching and other school activities which a teacher is expected to perform. It is necessary to have a time schedule reflecting allocation of time for different kinds of teaching practice viz., those at the teacher education institution and those to be undertaken in the schools. This would be necessary for ensuring the weightage assigned for this component in the curriculum. Consultation with the staff and the school authorities helps in making this component a collective endeavor and remove ambiguities and non-cooperation.

Documents such as syllabus, timetable, annual calendar and correspondence with schools.

The institution has a scheme of assessment for the programme and there are mechanisms to ensure that the scheme of assessment is known to all and is adhered to in implementation.

The institution has a scheme of assessment, which is appropriate for measuring all expected outcomes objectively and comprehensively. It is made known to the students and teachers well in advance and its adherence is monitored.

A teacher education programme has various components that are aimed at achieving various objectives of the programme. Not only the components have weightages for allocation of instructional time, they also have different weightages for assessing a student teacher. A scheme of assessment maintains weightages, directs the frequency of assessment and their nature. It would also inform the student and the teacher as to when assessment is to be made and provide appropriate feedback to students and teachers for making necessary adjustments.

The syllabus, evaluation protocol, minutes of staff meeting.

The institutions provides comprehensive inputs by incorporating the required experiences for achieving the stated objectives and realizes the vision.

The institution provides various inputs, activities and experiences that are well planned and not organized incidentally or accidentally. All should know the need and the purpose of organizing them and they should be acceptable to all and that they are in tune with the objectives and the vision of the programme. Not only that every experience should relate to one or the other
objective of the programme, there should be at least one experience for every objective.

**Importance of the Indicator**

A teacher needs to have a sound knowledge base of the content and pedagogy, should have the right attitudes and commitments, and also should be able to achieve the objectives of the school education in a variety of contexts of which he/she would work in future. For this to happen, the teacher education programme should not only have a variety of inputs, activities and experiences, but they should also be sequenced properly.

**Source of evidence**

Documents such as syllabus, academic calendar, annual report and students.

**QUALITY ASPECT**

**Curriculum Revision**

**INDICATOR 10**

**The basis for curriculum revision emerges from the need to achieve stated objectives effectively.**

**Operational Definition**

The curriculum revision is based on the database and experiences of implementation. Hence, the experiences and insights of all concerned are collected and the areas of weaknesses and redundancy in the curriculum are reviewed before revising the curriculum.

**Importance of the Indicator**

Curriculum revision is a continuous process. Even though it is difficult to revise the curriculum on an yearly basis, the experiences and insights in implementing it over years need to be recorded and the inputs strengthened. The aspects necessary for improving efficacy of the programme are identified and revisited at the time of revision.

**Source of evidence**

Successive curricula, records on revision, staff.

**INDICATOR 11**

**The institution undertakes curriculum revision on a regular basis.**

**Operational Definition**

A curriculum review meeting is held at least once in a year and the curriculum is revised at least once in three years.

**Importance of the Indicator**

Taking corrective measures to remove irrelevant aspects, strengthening existing weak components and adding essential inputs through review can improve the effectiveness of the programme. A quality programme has provisions for doing so on a timely and regular basis.

**Source of evidence**

Records pertaining to curriculum revision and implementation.
Admission to the programme is a transition from one academic environment to the other. Adjusting to the new environment is essential for a new entrant to effectively participate and benefit from the programme. Moreover, as all expectations and guidance cannot be informed through the admission announcement, the institution organizes orientation programme for the benefit of the new entrants.

The induction programme is a part of the academic calendar of the programme and is an institutional event. All concerned teaching and non-teaching participate in it and have their roles specified.

An induction programme is one of those occasions when all staff and students come together. It is a confidence building measure and would foster familiarity. A well-organized induction would reduce the incidence of drop out due to apprehensions and lack of information.

The annual calendar, students and staff.
QUALITY ASPECT  

**Transaction of Theory**

INDICATOR 15  

The institution emphasizes that the faculty members use interactive and participatory approach in the transaction of curriculum.

Operational Definition  
The teacher educators employ interactive and participatory approach in the teaching of theory and foundation courses. Explanations and Justifications are developed with the help of students and not ‘taught’ to them.

Importance of the Indicator  
Learning is a process of construction of knowledge and not one of receiving it from a person who knows. A learner finds it difficult to retain a content that does not integrate meaningfully with his knowledge base. Interactive and Participatory approach provides scope for removing the conceptual difficulties and misconceptions of students and creating a feeling of responsibility in learning.

Source of evidence  
Syllabus, classroom process, staff and students.

INDICATOR 16  

The institutional processes are geared to develop reflective thinking and practice both individually and in groups.

Operational Definition  
Students are provided with material and experiences to reflect upon. The teacher educator employs an ‘eliciting’ stance rather than an ‘informing’ stance. Questioning is employed extensively and students are called upon to recall their experiences and tryout/demonstrate their thinking, both individually and in groups.

Importance of the Indicator  
Teaching is an act of making right kind of decisions at right time in a classroom. In order to do so, a student teacher must not only know how to act but also be able to reflect on the actions with a view to analyze their effectiveness. Hence, teaching is viewed as a reflective practice and the teacher a reflective practitioner.

Source of evidence  
Staff and students, classroom process.

INDICATOR 17  

Interconnectedness between various components of the programme are visualised and established.

Operational Definition  
The teacher educators as well as the student teachers know why and how one component of the programme is connected to another. Conscious efforts are made by the teacher educators to establish the interconnectedness in theory as well as practice.

Importance of the Indicator  
The separation of one component of the programme with the other is only an arrangement made for organizing the programme. Several inputs provided parallally or sequentially, aim at achieving the same goal. Hence, for synergy to occur, the interconnectedness of components is to be visualized and established.

Source of evidence  
Syllabus, timetable, staff and students.
**INDICATOR 18**
The staff and students exhibit a high level of motivation for access to information and use of technology.

**Operational Definition**
The staff and students are not complacent with their knowledge base. They are found seeking new information and revising existing ones and employ information technology in doing so.

**Importance of the Indicator**
Complacency with oneself is not a sigh of professionalism. One who is satisfied with what one knows is not likely to grow. In a world where newer and better techniques and methodologies are regularly discovered, both the teacher and the learner must exhibit a motivation for access to information.

**Source of evidence**
Institutional infrastructure, staff and students.

**QUALITY ASPECT**  
*Transaction of Practical Experiences* (05)

**INDICATOR 19**
The readiness in terms of preparation and planning for implementing practical experiences is comprehensive.

**Operational Definition**
All skills and competencies to be developed in a student are viewed as essential and various experiences for developing them are planned and implemented with sufficient preparations.

**Importance of the Indicator**
The nature and extent of preparations made for an intervention reflects the extent to which it is viewed as important and essential. Since teaching skills practice is an inseparable component of teacher education, the planning and preparation for its implementation needs to be comprehensive.

**Source of evidence**
Timetable, staff and students.

**INDICATOR 20**
The school-based experiences are comprehensive and include experiences in performing various functions of a teacher.

**Operational Definition**
There exists clarity about the multifarious roles and functions of a teacher. The student teacher is provided with opportunities to perform and practice them in accordance with their relative importance.

**Importance of the Indicator**
A teacher has to perform various roles and functions in a school apart from teaching. A quality teacher education programme provides experiences for a student teacher to learn how to perform them.

**Source of evidence**
Student records, staff and students.

**INDICATOR 21**
The process of nurturance and mentoring of student teachers is visualized and institutionalized.

**Operational Definition**
Nurturance and Mentoring of student teachers is not an accidental process. It is a systematic and planned attachment of students to staff of the teacher education institution and of the school. There exists a clarity of purpose of attachment.
Acquisition of skill and competency is a gradual process requiring practice, feedback and corrective actions. If some of them happen at the teacher education institution, there are others that need to be practiced in the school under the supervision and guidance of a teacher. There is a need to have clarity about the place and purpose of an experience in teaching that is known to all. Institutionalizing the process ensures regularity in its occurrence.

Staff of the institution and schools and students.

Operational Definition

There exists an arrangement for feedback from the supervisor and peers, reflection by the student teacher and follow-up with respect to Practice and Experience Inputs.

Making provisions for Practice and Experience inputs are followed by feedback, reflection and follow-up.

Staff and students.

The institution employs assessment and evaluation data for enhancing competence, apart from grading and certification.

Assessment and Evaluation system employed has also a qualitative dimension that is used for enhancing the competence of student teachers.

One of the purposes of evaluation is to provide development-inducing feedback. Hence, there is a need for qualitative feedback based on evaluation. Further, it should also help a teacher educator to plan experiences and activities for enhancing the present level of student performance.

Evaluation protocol, observation records.

The evaluation protocol used by the institution for the programme is comprehensive in its coverage of objectives.

The evaluation protocol of the programme includes all stated objectives and the Approach/Guideline for assessment and evaluation are available and employed.

Objectives to be achieved need learning experiences and evaluation is the process of knowing their attainment. A programme that states objectives that are not evaluated or assessed gets neglected in implementation. Hence, all stated...
objectives must form a part of the evaluation protocol of the programme. This would give direction to the inputs and monitoring the outcomes.

**Source of evidence**
Syllabus and evaluation protocol.

**INDICATOR 25**

**The mechanism employed for gathering, consolidating and disseminating evaluation data reflects fairness and transparency.**

**Operational Definition**
The student teachers and teacher educators are aware of the nature of assessment followed for different components of the programme. The assessments made are brought to the notice of the student teachers and their agreement is sought before finalization.

**Importance of the Indicator**
Evaluation is a process of indicating level of learning as well as areas where learning has not happened or is to be improved upon. Hence, not only the students should know what is being assessed, but they should also be aware of the way in which they are going to be assessed. Such a process makes evaluation objective.

**Source of evidence**
Staff and students.

**INDICATOR 26**

**The institution employs ICT extensively in assessment and evaluation activities of the programme.**

**Operational Definition**
The institution employs information and communication technology for preparation, storage, reprography, processing information and reporting on activities of assessment and evaluation.

**Importance of the Indicator**
Traditionally, institutions have had problems with large-scale data storage, management and processing. Information and communication technology is useful in several activities involving information processing and management. Using ICT enhances the efficiency in performing these activities.

**Source of evidence**
Infrastructure facilities, evaluation records and reports.

**QUALITY ASPECT**

**Teacher and Teaching**

**INDICATOR 27**

**Students perceive that the faculty display the professional and human qualities of a role model and of good practice.**

**Operational Definition**
The student teachers express satisfaction over the professional and human qualities of teacher educators and show a desire to emulate them.

**Importance of the Indicator**
Mere mastery of content and pedagogy does not make a good teacher. An inspirational teacher has also the traits and behaviours that can inspire. Teacher educators and teachers in schools can provide a role model for the student teachers to emulate.

**Source of evidence**
Students.
QUALITY INDICATORS FOR TEACHER EDUCATION

WEIGHTAGE

QUALITY ASPECT  Research

INDICATOR 28  The faculty undertakes and uses research output.

Operational Definition

Individual and team researches are undertaken by the faculty on a regular basis, and the results/outcome is shared formally and reported for use by the faculty.

Importance of the Indicator

Research is an integral part of quality practice in teacher education. It helps the faculty to keep abreast with the current knowledge and developments in the field of teacher education, find answer to questions and evolve/adopt strategies and techniques. The faculty need to undertake research with a view to develop new and innovative tools and approaches. Having a forum to discuss research issues and findings is an integral part of the academic environment of a quality institution.

Source of evidence

Research publications and reports, staff.

INDICATOR 29  The institution encourages and makes provisions for innovative practice.

Operational Definition

Unique and homegrown practices are found in the programme that has evolved through a process of research and inquiry and over a period of time.

Importance of the Indicator

Every institution where the programme is implemented is a unique context for implementation and hence it is desirable that there are variations and adaptations made to the programme to suite the context. More over a vibrant institution has its additions to the common vision and has homegrown solutions to problems.

Source of evidence

Staff and students.

QUALITY ASPECT  Development

INDICATOR 30  The faculty undertakes development of instructional material.

Operational Definition

The faculty has received training and has competence in development of Instructional Material, including those using ICT.

Importance of the Indicator

There exists a difference between the skills and competence required for teaching and those needed for developing instructional material. Hence they need to be acquired through specific training programmes. The faculty must be competent to create the media and material necessary for implementing the programme and the institution must ensure that the competencies are available/acquired.

Source of evidence

Instructional material developed, students, infrastructure.

INDICATOR 31  The instructional materials developed are employed in transacting the programme inputs and are institutionalized.

Operational Definition

Various types of instructional material for teacher education as well as school
education are used in the implementation of the programme. The faculty extensively employs technology in developing such institutional material.

**Importance of the Indicator**
Textbooks and reference books are not the only kind of instructional material needed in the making of a teacher. Even if standard text books are available, they may not be in the form that is appropriate. For example, one language version may not suit the students who speak another language. More over several exemplar material and media products are necessary to create and provide the right kind of learning experiences.

**Source of evidence**
Staff and students.

**QUALITY ASPECT**
*Extension*

**INDICATOR 32**
The extension activities are need based and meet societal needs.

**Operational Definition**
The institution has a close linkage with the society of which it is a part and it undertakes extension activities in areas of its strength to meet some of the needs of the society.

**Importance of the Indicator**
Schools are artifacts created by the society and quality teacher education has to have linkages with the society. One form of linkage is to understand the needs of the society and organize activities to meet some of them.

**Source of evidence**
Records and reports, beneficiaries.

**INDICATOR 33**
There exists a preparedness for and incidence of extending service to other academic institutions.

**Operational Definition**
The teacher education institution provides academic leadership to the institutions around it and there exists a keenness to respond to the requests for help and guidance.

**Importance of the Indicator**
For teacher education to be responsive to the local realities, it should have functional linkages with schools and other educational institutions around it. Not only that it receives help and facilities from the school to organize some of its activities, it should also take lead and provide an academic forum for discussion educational issues and support for solving the problems.

**Source of evidence**
Records, beneficiaries.
Physical Infrastructure

The physical infrastructure of the institute is suitable and adequate for effectively implementing the programme.

Operational Definition

The physical infrastructure is designed to implement all components of the programme effectively and is strengthened regularly keeping in view, the requirements of staff and students.

Importance of the Indicator

The theory and practice inputs of the programme require different types of physical infrastructure and furnishing. It is not merely the space available but the way in which activities envisaged in the programme can be implemented that decides the quality of the programme. For example, each of the methods course has its own requirements and the inputs in ICT need arrangement for equipments and hardware to reach all students.

Source of evidence

Mechanism of upkeep, support staff.

Instructional Infrastructure

The teaching-learning material, ICT facilities, laboratories and learning resource centre necessary for implementing the programme are available and utilised on a regular basis.

Operational Definition

The teaching-learning material, ICT facilities, laboratories and learning resource centre necessary for implementing the programme are available in the institute. They are well maintained and strengthened from time to time by making available necessary finances and human resources. They are accessible and utilized by the staff and students on a regular basis.
Every input of teacher education requires unique facilities. The teaching learning material in the library; the ICT facility, Education Technolog Laboratory; Methods Laboratory; and Learning Resource Centre are some such facilities necessary for implementing a teacher education programme. Without their availability, certain hands-on experiences necessary for competency and skill development are difficult. Hence, a quality teacher education programme will have these facilities. Efforts will be made by the institutions to strengthen them with the latest technology and material and make them accessible to all staff and students.

Source of evidence: Infrastructure, staff and students.

**Human Resource**

**INDICATOR 37**  
**The staff has the professional competency required for implementing the programme.**

**Operational Definition**

Suitably trained and professionally competent staff provides different course inputs. Wherever necessary, the institution has policy for training and re-training of the staff and to encourage specialized professional training.

**Importance of the Indicator**

The quality of teacher educators is an important factor that decides the quality of teacher education. The content and pedagogical inputs of teacher education require teacher educators who are qualified and competent to provide them. Their professional development should be of concern for an institution that seeks to provide quality teacher education.

**Operational Definition**

Students feel confident in approaching the staff for guidance and consultation and perceive that there exists no institutional barrier that restricts them from meeting the staff or from utilizing the institutional resources when they need them.

**Source of evidence**

Students and staff.

**INDICATOR 38**  
**The faculty and resources are accessible to the students for guidance and consultation.**

Apart from the structured inputs provided in the programme, students do need to consult the staff for clarifying their doubts and share their ideas. A teacher educator needs to play the role of a mentor and thus become a role model for the student teachers. The availability of staff and resources at short notice develops an ownership feeling among student teachers about the institution.

**Operational Definition**

Students and staff.

**INDICATOR 39**  
**There exists a concern and initiative for upgradation of professional skills and competency of staff.**

Both the staff and the administration recognize that professional development is
a continuous process and both show interest and concern in seeking professional development. The teacher educators do not feel that they are restricted from achieving professional development.

The emerging issues, concerns and technologies in the field of education in general and teacher education in particular can be effectively incorporated into the programme only if the staff undertakes an up gradation of their skills and competency. Hence, the staff and administration should take initiatives for continuous up gradation in the professional skills and competence of staff.

Staff development activity reports and records.

The pass percentage of the programme is satisfactory and consistent. No student teacher has to repeat the programme for want of instructional inputs and the results of the programme indicate that the pass percentage over years is high.

Outcome of a teacher education programme is an indicator of quality. High pass percentage means that the programme has made a comprehensive impact on the student teachers. Consistent high percentage of students who successfully complete the programme indicates that the processes and inputs are stable and institutionalized.

Records of examination and result.

The reasons for dropout are acceptable and the dropout percentage of the programme is well within the expected limits.

The students who drop out of the programme do so due to reasons other than dissatisfaction with the staff, facilities or quality of inputs provided in the programme. Also, very few students drop out after taking admission or migrate to other institutions of teacher education.
### QUALITY ASPECT: Feedback Mechanism

**INDICATOR 42**

**The institution shows concern for placement and a high percentage of products are employed in teaching.**

#### Operational Definition

The institution has a placement cell and provide placement related inputs and guidance for students. There exists a record of placements made by the institution and the wait period after completion of the programme is minimal.

#### Importance of the Indicator

A quality programme leads to a quality product. If the students do not have to wait for placement and if the schools come forward to conduct campus interviews and show interest in appointing the products even at a reasonable pay and wages, the programme can be considered as of high quality.

**Source of evidence**

Records of admission and examination.

**INDICATOR 43**

**Operational Definition**

There is no gap between performance and feedback and the feedback provided is comprehensive.

**Importance of the Indicator**

Feedback is essential for finding out the strengths and identifying the areas where growth is possible. If feedback is given immediately after performance, the trainee shows an interest to improve and time would be available for doing so.

**Source of evidence**

Staff and students feedback proforma and student records.

**INDICATOR 44**

**Operational Definition**

Feedback given is based on data obtained from more than one source. The information obtained from different sources is collated for arriving at a comprehensive feedback.

**Importance of the Indicator**

The feedback data are both quantitative and qualitative by nature and may be obtained from different sources. If feedback is provided based on a single source from where the data is obtained, it may not lead to changes in all aspects. Hence, there is a need to collect data from multiple sources and they need to be collated for arriving at valid observations and suggestions for change.

**Source of evidence**

Annual report, present and past students profile, records of placement cell.
There are evidences to show that feedback is used for development.

Operational Definition
Feedback is not treated as a formal requirement of the programme. Both staff and students view that they are necessary for improvement and they are used for specific improvements leading to professional development.

Importance of the Indicator
Writing feedback reports for trainees to improve their performance is an essential aspect of teacher education programme. Teacher educators should spend time and effort on developing feedback reports for trainees and should follow them up with specific inquiries and inputs for development.

Progress in implementation of the programme and extent of achievement of students are monitored, discussed and weaknesses identified for remediation.

Operational Definition
The staff uses the monitoring system for identification of objectives not achieved satisfactorily. The findings are discussed in a forum created for the purpose, and decisions are taken on the remedial measures/adjustments to be made.

Importance of the Indicator
The inputs of a programme may not be suitable for certain students since they are implemented in a group context. There is a need to identify the reasons for poor attainment. Having identified the hard spots, remedial measures are to be planned and implemented. Institution must have a laid down procedure for planning and implementing remedial measures/adjustments to be made.
designed inputs in the light of their learning difficulties and areas of poor attainment.

Importance of the Indicator
Remediation is a student support service that is based on the view that all students may not learn equally well from a general input provided in a group context. It should be a planned intervention rather than a sporadic activity of a few staff members.

Source of evidence
Staff and students.

QUALITY ASPECT
Guidance and Counseling Service

INDICATOR 49
Institution has a well structured, organised, proactive guidance and counseling unit.

Operational Definition
The institution has guidance and counseling service, which is one of the student support services provided by the institute. Students are aware of and benefits from the service.

Importance of the Indicator
Guidance and counseling service is essential for educational, socio-personal and vocational development of the student teachers. It recognizes the fact that students do have various difficulties that are not possible to be addressed in a group. There is a need to provide individualized support depending on the nature and extent of problems confronting the students.

Source of evidence
Staff and students.

INDICATOR 50
The institution has qualified staff and faculty for providing guidance and counseling services.

Operational Definition
The institution recognizes that guidance and counseling is a specialized service and it has on its roll persons who are qualified and trained for providing guidance and counseling.

Importance of the Indicator
The teacher educators are not trained to undertake guidance and counseling activities and hence are not competent to provide such a service. It requires qualified staff who can plan and implement guidance activities and provide individualized counseling to the needy students.

Source of evidence
Staff profiles.

INDICATOR 51
Students perceive that the guidance and counseling service is comprehensive in its coverage of student needs and is useful to them.

Operational Definition
Students use the guidance and counseling service voluntarily; they find the staff competent; and opine that the service takes into account their educational, socio-personal and vocational needs comprehensively.

Importance of the Indicator
The reason for which one student teacher seeks guidance is different from that of the other. If some require it to solve their educational attainment related problems, there would be others who need it for...
personal development. There exists no hierarchy among needs and each need is as important as the other. All students must get help from the guidance and counseling facility of the institution.

Source of evidence  Past and present students.

**QUALITY ASPECT**  
**Admission Related Services**  

**INDICATOR 52**  
**Operational Definition**  
The admission notification of the programme is given wide publicity.

**Importance of the Indicator**  
There is a need to attract students from far and wide if the intake quality has to be high.

**Source of evidence**  
Admission notification and related correspondence.

**INDICATOR 53**  
**Operational Definition**  
Students seeking admission have an access to current information about the programme and procedure.

**Importance of the Indicator**  
Students have various choices before they decide to seek admission to a teacher education programme. For choosing the institution the students look for details on the availability of various facilities and the quality of the services provided. For this the institution should post all the details on their website. Also all necessary information must from a part of the admission notification.

**Source of evidence**  
Admission notification, students.

**QUALITY ASPECT**  
**Social, Cultural and Leisure Activities**  

**INDICATOR 54**  
**Operational Definition**  
The institution has infrastructure and facilities for social, cultural and leisure time activities for the students.

**Importance of the Indicator**  
The institutional infrastructure includes those necessary for social, cultural and leisure time activities of student teachers.

**Source of evidence**  
Institutional infrastructure.

**INDICATOR 55**  
**Operational Definition**  
The institution promotes active participation of the students in social, cultural and leisure time activities.

**Importance of the Indicator**  
The annual calendar of the programme includes social and cultural activities. Student groups and clubs are constituted for pursuing special interests and hobbies,
and students have time available to participate in these activities.

**Importance of the Indicator**

An effective teacher is not only competent in content and pedagogy, but also a promoter of social and cultural and vocational development of students. A programme that prepares such a teacher should ensure that appropriate social, cultural and leisure time activities are a part of the academic calendar and that students participate and contribute to them regularly.

**Source of evidence**

Students, annual report, records of clubs/associations.

**INDICATOR 56**

**Operational Definition**

There exists a support network for social, cultural and leisure time activities of students.

**Importance of the Indicator**

The institution earmarks funds and assigns staff to plan and execute the social, cultural and leisure time activities through out the academic year. A report of such activities is also a part of the annual report of the programme.

**Source of evidence**

Financial statement, annual report.

**INDICATOR 57**

**Operational Definition**

The institution clearly defines the objectives of activities, roles and functions of staff involved and they are made known to all concerned.

**Importance of the Indicator**

When several activities have to take place, it is necessary to have a clarity regarding who will do what and how will it be done. If activity areas match with the competency and interest of staff responsible for them, the activities would be planned and implemented earnestly. Hence there is a need to decide the activities, the staff to organize them and make financial provisions.

**Source of evidence**

Staff activity chart, staff.
An activity, to be organized effectively, needs to be monitored at different stages and mid-term corrections made, if necessary. Hence, regular monitoring is an indicator of effective implementation of an activity. 

Administrative Heads, minutes and circulars.

**INDICATOR 59**

The institution communicates the information obtained on monitoring to all concerned for taking corrective measures leading to the effectiveness of activities and improvement.

The observations and decisions of monitoring teams are recorded and circulated to the concerned for follow-up action.

Monitoring is a tool for corrective action. Corrective action is possible if the information of monitoring is available and used for subsequent action and improvement.

Records, circulars, staff.

**INDICATOR 60**

The programme is administered by competent persons and is professionally managed.

The students and staff perceive those at different positions of administration as competent. Persons in position exhibit professionalism in their work.

Leadership cannot be thrust upon. Those who have to follow a leader must accept and agree on the capabilities of the leader. Contentions create confusion. The leader on his part must know how to lead. A programme that is implemented at different levels, should have a sound administrative system.

Administrator profile, administrator, staff.

**INDICATOR 61**

The institution exhibits gender sensitivity in all aspects of management.

The institutional rules, policies, provisions, and facilities show a concern for gender issues and incorporate gender sensitivity.

An institution is for and run by both men and women. Traditionally, the rules, policies, provisions and facilities have favoured only one gender group. A quality institution is progressive and hence must exhibit gender sensitivity in all aspects of its management.

Administrator, staff and students.

**QUALITY ASPECT**

**Academic Calendar**

The institution has an academic calendar that reflects all the activities of the programme.

There exists an agreement between the annual academic calendar and the annual report in so far as the activities planned and organized are concerned.
Unplanned, incidental and sporadic activities and inputs may not have a synergy with those planned in a programme. The effect of the activities is enhanced in a program if they are planned well in advance.

**Source of evidence**
Academic calendar, annual report.

**INDICATOR 63**

**The activities contained in the academic calendar are for optimizing the educational achievement of students.**

**Operational Definition**
The activities in the academic calendar match with the vision and objectives of the programme and are perceived to contribute to the educational achievement of students.

**Importance of the Indicator**
The academic calendar is a manifestation of the vision and objectives of the programme and hence it must reflect student achievement and growth as its core concern.

**Source of evidence**
Prospectus, annual report.

**QUALITY ASPECT**  
**Faculty Recruitment**

**INDICATOR 64**
The faculty recruitment is made by the institution in accordance with laid down procedure and attracts and appoints competent and qualified persons.

**Operational Definition**
The recruitment notification stipulates the essential and desirable qualifications clearly and they are in line with the requirements of the programme and adhere to the laid down norms for recruitment. There exists a consistency across notifications made for similar positions.

**Importance of the Indicator**
Quality of a programme depends on the quality of the staff that implements it. Adhering to the norms for recruitment shows a concern for quality. Such a concern is reflected in the notification issued for recruitment.

**Source of evidence**
Recruitment notification, staff profiles.

**INDICATOR 65**

**The institution follows a selection procedure that is clear and transparent.**

**Operational Definition**
A committee of experts makes selection and every candidate is given a fair chance to present one’s credentials. The committee records the proceedings of the selection procedure and reasons for selection and rejection.

**Importance of the Indicator**
Eligible and competent candidates seek appointment in an institution in which merit and competency are the criteria for selection. Hence, the selection procedure should be clear and transparent. Decisions made by a group of experts would ascertain fairness and transparency in recruitment.

**Source of evidence**
Records pertaining to selection, staff.
The recruited staff has a pay and reward system that is at par with that of other institutions and as per government norms.

The pay and wages offered are the same as those stated in the recruitment notification. It compares favorably with that of other institutions and adheres to the existing norms attracting highly qualified and motivated staff.

The motivation and commitment of the staff is affected if what is stated as wages and incentives are not the one that is provided. Qualified and competent staff is likely to migrate to other institutions and cause a staff competency and experience erosion in the programme. In the long run the institution fails to attract and retain qualified and motivated staff.

Financial Governance

The institution has adequate financial resources to run the programme without any constraints.

The institution has adequate financial resources and there are no incidents of over drafts, under payment and delayed payment or delays in fulfilling the commitments.

Financial stability ensures that no planned activity is withheld or cancelled due to want of funds. The staff feels secure and shows no hesitations or uncertainty about institutional activities.

The fee structure for the programme is transparent with least unexpected add-on expenditure to be incurred by the students.

The institution has a stated fee structure that is known to all. There are no incidents of collecting additional fees from the students.

The fee structure is based on an estimate of all expenditures on the programme. Uncertainty about the fee structure indicates an uncertainty about the items of expenditure. Transparency in financial transactions is necessary for financial accountability. The management should not view a programme as a means to amaze wealth.

The sources of income for the programme in particular and the institution in general are legitimate and known.

The institution does not raise funds from any agency or source that has no legitimate interest in quality teacher education. All sources of income are recorded and known.

A teacher education programme should not be viewed as a means for collecting funds from a source or agency that is not...
legitimately concerned with teacher education. The income for a programme, hence, should come from a legitimate source and be known to all concerned.

**INDICATOR 70**

There exists a transparency in financial management of the institution in terms of income and expenditure.

**Operational Definition**

The funds for the programme are not transferred to meet the expenditure other than those connected with the programme. The expenditure is budgeted under specific heads of accounts and is adhered to. The accounts are maintained on a day-to-day basis and all transactions are made through instruments of bank.

**Importance of the Indicator**

Regulation of funds for a programme should be based on clearly laid down procedures of financial management. At any time in implementation, the institution should be in a position to know its fund position. Since the institution has an annual academic calendar, all items of expenditure should be known and budgeted. The overheads in expenditure need to be within acceptable limits.

**Source of evidence**

Income expenditure, statements and related documents.

**QUALITY ASPECT**

**Academic Quality and Management**

**INDICATOR 71**

The income and expenditure of the institution are subjected to regular internal and external audit.

**Operational Definition**

The institution prepares financial statements every year and they are contained in the annual report of the institution. Qualified auditors audit all accounts of the programme and the observations made are discussed and steps taken to improve financial management.

**Importance of the Indicator**

A quality teacher education does not commercialize the programme or follow an unsystematic and unplanned financial transaction. Transparency in transactions creates a credible image and contributes to the democratic management.

**Source of evidence**

Audit report and documents.

**INDICATOR 72**

The institution has mechanisms to undertake internal academic audit of the programme.

**Operational Definition**

The institution has a mechanism for academic auditing that is known to the staff. Academic auditing is undertaken as per plans and the outcomes recorded and communicated to all concerned.

**Importance of the Indicator**

Academic auditing is an essential process for generating feedback on the academic standard and quality of the programme provisions. It can act as the basis for
identifying and implementing initiatives for improvement of academic quality.

**Source of evidence**
Internal audit report, registers and documents.

**INDICATOR 73**

**The faculty are involved in the management of the programme and the institution.**

**Operational Definition**
The institution believes in participatory management. There is a proper understanding between the instructional and management staff. Several managerial functions are assigned to staff members and they have functional freedom to undertake them.

**Importance of the Indicator**
A quality teacher education programme is owned by the staff and is designed implemented and managed by the staff. Such an approach does not discriminate between the academic and administrative staff.

**Source of evidence**
Work allocation chart, staff.

**INDICATOR 74**

**The institution uses a management information system for running the programme.**

**Operational Definition**
The institution has evolved a management information system that is up-to-date and is used by the administration in management of the programme.

**Importance of the Indicator**
An effective management is possible if the information base for taking managerial decisions is accurate and is easily available.

A management information system is that mechanism whereby an institution classifies, collates and records information about various aspects of a programme.

**Source of evidence**
The management information system.

**INDICATOR 75**

**The performance of every faculty member is regularly appraised by the peers and the head of the department/unit/institution.**

**Operational Definition**
The institution has a system of self-appraisal by the staff members and is undertaken at the end of each academic year. The appraisal is recorded on a format and used for providing feedback and performance improvement of the staff.

**Importance of the Indicator**
Any effort at improvement is based on the assessment of aspects in which improvement is possible. A self-appraisal by the staff is an expression of concern and commitment for improvement in performance. Appraisal can also indicate the extent of clarity in the staff regarding the functions to be performed by them.

**Source of evidence**
Staff appraisal reports, staff and supervisor.
CONCLUSIONS

Over the years much data has been collected on the indicators for administrative purposes. Unfortunately it has neither been used for the purpose of quality improvement nor has been rigorously assessed for various dimensions of data quality such as accuracy, reliability and reproducibility. It is therefore essential that a formal process of acting on results be in place. Consideration of these recommended indicators by the institutions with a serious intention for quality improvement might result in good practices resulting in improved Teacher Quality.

Although the recommended indicators represent a good set of measures, it is important to recognize that these indicators will require considerable refinement over time and lot of contextualizing. In a way these indicators are the beginning of the benchmarking process – an identification of the aspects and processes to be addressed. On self-assessment by the institutions, these would highlight the perceived strengths and weaknesses. External assessors can use this indicators and the good practices in evaluating the institutions and the assessment agencies to develop a good practice database and establish benchmarks. The use of these indicators by the external assessors will make the assessment more context-free and objective. It is envisaged that a provision of unblended data with public access will enable the performance of teacher education institutions to be opened up to greater public scrutiny and enhance
accountability. In terms of future it is the user’s view that will be a critical driver behind any upgrades and further conceptual development.

A fairly strong association between teacher training and teacher effectiveness and learning efficiency, and adverse effects on the learner appear to be especially common after transitions. Quality of the teacher educators, participatory role of practice teaching school staff in the skill development process, and use of a core set of data in transition from one type of teaching to another are some of the areas on which we would like to work in future. Though development of a standard for a teacher training programme and benchmarking which would result in teacher effectiveness would be highly controversial, and would be especially difficult to do at the teacher education level, given the many differences between the teacher training programmes and school systems, we would like to attempt on it in future.
Depending on the need, the information/score of the indicators may be clubbed for getting data/information on each quality aspect or the key area.

Annexure II

Format for Feedback on the Value of the Recommended Indicators

The following statements describe the recommended quality indicators for teacher education. You are requested to rate the indicators on the five point scale given below. You may rate the indicators considering the value of the data / information these indicators provide as a measure of the quality of a teacher education Institution and its programme. (1 = of no relevance, 2 = not adequate, 3 = adequate, 4 = good, 5 = excellent)

</tbody>
</table>
55 The institution promotes active participation of the students in social, cultural and leisure time activities.

56 There exists a support network for social, cultural and leisure time activities of students.

57 The institution clearly defines the objectives of activities, roles and functions of staff involved and they are made known to all concerned.

58 The activities are regularly monitored at different levels by the concerned.

59 The institution communicates the information obtained on monitoring, to all concerned leading to corrective measures for improving the effectiveness of activities.

60 The programme is administered by competent persons and is professionally managed.

61 The institution exhibits gender sensitivity in all aspects of management.

62 The institution has an academic calendar that reflects all the activities of the programme.

63 The activities contained in the academic calendar are for optimizing the educational achievement of students.

64 The faculty recruitment is made by the institution in accordance with laid down procedure that attracts competent and qualified persons.

65 The institution follows a selection procedure that is clear and transparent.

66 The recruited staff has a pay and reward system that is at par with that of other institutions and as per government norms.

67 The institution has adequate financial resources to run the programme without any financial constraints.

68 The fee structure for the programme is transparent with least unexpected add-on expenditure to be incurred by the students.

69 The sources of income for the programme in particular and the institution in general are legitimate and known.

70 There exists a transparency in financial management of the institution in terms of income and expenditure.

71 The income and expenditure of the institution are subjected to regular internal and external audit.

72 The institution has mechanisms to undertake internal academic audit of the programme.
73. The faculty are involved by the institution in the management of the programme.

74. The institution uses a management information system for running the programme.

75. The performance of every faculty member is regularly appraised by the peers and the head of the department/institution.

Suggest any other indicators that you think would be useful for assessing the quality of the teacher education institutions and their programme provisions.

About NAAC

The National Assessment and Accreditation Council (NAAC) is an autonomous organisation established in 1994, on the recommendations of the National Policy of Education (NPA) and its sequential programme of action (POA). It is the only external quality assurance agency for higher education in India. The activities and future plans of NAAC are guided by its vision and mission that have a focus on making quality assurance an integral function of the higher education institutions. Its vision is “To make quality the defining element of higher education in India through a combination of self and external quality evaluation, promotion and sustenance initiatives.” Striving to achieve its vision and mission, the NAAC primarily assesses the quality of institutions of higher education that volunteer for the process, through the internationally accepted methodology. Since its establishment the NAAC has so far accredited 2558 colleges and 122 Universities in India. It has helped the institutions of Higher education and the state governments in their pursuit of quality and excellence through its various programmes and materials developed. The action plan of NAAC is focussed based on the following three major areas:

- Quality Promotion
- Quality Evaluation
- Quality Sustenance

About COL

Headquartered in Vancouver, Canada, Commonwealth of Learning (COL) is the only official Commonwealth agency located outside Britain and is the world’s only intergovernmental organisation solely concerned with the promotion and development of distance education and open learning. COL is helping to increase the capacities of developing nations to meet the demands for improved access to quality education and training. Through its activities COL established an extensive network of education and technology specialists around the world; and facilitated systemic changes in the delivery of education and influenced government policy.

For the three years, 2003 to 2006, COL has identified three priority programmes to support its overriding purpose of Building Capacity in Open and Distance Learning (ODL):

- **ODL Policy** - fostering the adoption and implementation of open and distance learning policies within the broader educational and human resource development strategies and policies of members nations
- **ODL Systems Development** - assisting in the development of open and distance learning systems that build on existing capacity or assist in creating new capacity appropriate for the contexts of member states
- **ODL Applications** - demonstrating how open and distance learning applications can benefit individual learners, institutions and member states by accelerating human resource development

The plan is also based upon six areas of operation:

- Advisory
- Advocacy
- Capacity-building
- Fostering networks and partnerships
- Knowledge management
- Research
